

Ross Condie

Software Engineer

Naturally curious and driven I am eager to advance my skills and step into a technical role. Through a diverse range of life and work experience with over a decade in the service industry, I bring a unique attitude to my development work. This outlook motivates me to consistently improve, while my persistent attention to detail ensures I am thorough in my approach. In addition I excel collaborating within a team.

PERSONAL PROJECTS

Constructed a Personal Portfolio website. (04/2023 - Present)

- ◇ [Github - Ross Condie Personal Portfolio](#) - This was a solo project created using **JavaScript, React and CSS**.
- ◇ I wanted to learn more about web design by building something useful to showcase my personal projects.
- ◇ Discovered how to use media queries to make my web application responsive on tablet screens and mobile devices.
- ◇ Using custom CSS variables to define values to be reused throughout my application which saved time and kept the colour theme consistent.

Recreated a popular ride-hailing mobile application. (04/2023 - 05/2023)

- ◇ [Uber Clone Capstone](#) - This was a paired project created using **React Native, Redux & Tailwind CSS**.
- ◇ Learned completely new frameworks and libraries (React Native & Redux) within a two week time frame. Incorporating Google Cloud API's such as Places/Directions & Distance Matrix API's.
- ◇ Pair programming and daily stand-ups were used to avoid conflicts and resolve bugs when merging changes to Github.
- ◇ Implemented a tipping feature as a stand alone component that could improve user experience within the app.

Built a full-stack web application for a portfolio of stocks and shares. (03/2023 - 03/2023)

- ◇ [Atlas Wealth](#) - This was a group project built with **JavaScript, React, Express, MongoDB & MaterialUI**.
- ◇ Gained experience on a group project by building a full-stack web app simulating real world proficiency on a working project.
- ◇ Working with agile methodologies such as daily standup's and kanban board planners to minimise errors and resolve conflict merges.
- ◇ Researched JavaScript libraries and became familiar with understanding how to read and use documentation effectively.

PERSONAL PROJECTS

Created a web application to track travel adventures. (02/2023 - 03/2023)

- ◇ [Fugitive Travel](#) - This was a solo project CRUD application created using **Python, HTML, CSS, Flask & PostgreSQL**.
- ◇ Comprehensive understanding of CRUD operations and their benefits.
- ◇ Learned to implement a static web application with a fully functioning back-end server database. Consolidating 4 weeks of learning into a one week project.
- ◇ Researched into following RESTful routing conventions.
