

Ross Condie

Junior Full-Stack Engineer

As a curious and driven Full-Stack Engineer I am eager to advance my skills and step into a technical role. Through a diverse range of life and work experience with over a decade in the service industry, I bring a unique attitude to my development work. This outlook motivates me to consistently improve, while my persistent attention to detail ensures I am thorough in my approach. In addition I excel collaborating within a team.

PERSONAL PROJECTS

Constructed a Personal Portfolio website. (04/2023 - Present)

- ◇ [Github - Ross Condie Personal Portfolio](#) - This was a solo project created using JavaScript, React and CSS.
- ◇ I wanted to learn more about responsive web design by building something useful to showcase my personal projects.
- ◇ Discovered how to use media queries to make my web application more responsive to tablet and mobile devices.
- ◇ Using custom CSS variables to define values to be reused throughout my application which saved time and kept the colour theme consistent.

Recreated a popular ride-hailing mobile application. (04/2023 - 05/2023)

- ◇ [Uber Clone Capstone](#) - This was a paired project created using React Native, Redux & Tailwind CSS.
- ◇ Learned completely new frameworks and libraries (React Native & Redux) within a two week time frame. Incorporating Google Cloud API's such as Places/Directions & Distance Matrix API's.
- ◇ Efficiently pair-programmed over the whole project, running daily meetings to merge changes to Github.
- ◇ Implemented a tipping feature that could improve user experience within the app.

PERSONAL PROJECTS

Built a full-stack web application for a portfolio of stocks and shares. (03/2023 - 03/2023)

- ◇ [Atlas Wealth](#) - This was a group project built with JavaScript, React, Express, MongoDB & MaterialUI.
- ◇ Gained experience working on a group project with three other developers building a full-stack web application over a one week period.
- ◇ Working with agile methodologies such as daily standup's and kanban board planners to debug and resolve conflict merges.
- ◇ Researched JavaScript libraries and became familiar with understanding how to effectively read documentation.

Created a web application to track travel adventures. (02/2023 - 03/2023)

- ◇ [Fugitive Travel](#) - This was a solo project CRUD application created using Python, HTML, CSS, Flask & PostgreSQL.
- ◇ Comprehensive understanding of CRUD operations and their benefits.
- ◇ Learned to implement a static web application with a fully functioning back-end server database. Consolidating 4 weeks of learning into a one week project.
- ◇ Researched into following RESTful routing conventions.
